Instructions for use

1. Ensure floor, back seals and bottom seal are clean and free from obstructions.
2. Centralise panel to aperture, ensuring vertical seal is facing aperture and thick horizontal seal is on the bottom. If your barrier has side rails ensure the panel sits centrally between these.
3. Apply gentle downward pressure to top of barrier in order to align bolt holes to both sides of barrier.
4. Using T grip handle as supplied tighten the bolts sufficiently so that no gap is visible between doorframe and barrier seal.
5. **IMPORTANT: TAKE CARE NOT TO OVER-TIGHTEN. OVERTIGHTENING WILL CAUSE THE BOLTS TO TWIST. UK FLOOD BARRIERS CANNOT BE HELD RESPONSIBLE IF THIS HAPPENS.**
